

Fuels and Combustion

WEBINAR

Improve your emissions, clinker quality and operating costs with online training from FLSmidth Institute.

The correct combustion of fuels have a direct impact on safety, emissions, clinker quality, refractory and kiln shell integrity and overall operating cost. This webinar provides knowledge of the different types of fuels, necessary understanding of the combustion process for the best possible flame.

- Characteristics of the different types of fuels
- Combustion mechanisms of the fuels
- Flame generation and the effect from combustion
- How emissions, clinker quality and operating costs depend on proper combustion of different fuels

DURATION: 75 minutes

REGISTRATION FEE: \$100
