

Fuller® Ful-Vane™ Compressor Annual Inspections

WEBINAR

Learn how to keep your Ful-Vane™ compressor running at peak performance by using the right inspection methods

Control cost and improve availability by understanding the proper inspection techniques for your Ful-Vane compressor. In this course our “Tell then Show” method will be used so that each participant will be able to see every step in the process and the proper sequence of dis-assembly. Each wear part will be examined and measured. Then, the proper reassembly procedure will be demonstrated.

- Safety practices
- What equipment and tools to perform the inspection
- Basic procedures and sequence for inspection
- How to determine if the internal parts are still serviceable or need to be replaced
- Tips on customizing procedures for specific installations (as time permits)

DURATION: 140 minutes

REGISTRATION FEE: \$100
