

Kiln Maintenance IV

Inspection and analysis

WEBINAR

Learn how to use data to create an optimal maintenance strategy

Inspection and analytical methods lay the groundwork for how we plan maintenance activities, outage plans, contingency plans, critical spares inventory, and maintenance and capex budgets. Join us in this webinar to learn how to use the data we collect from inspections and PM work to develop a kiln maintenance strategy to achieve world class availability.

The participants will learn about:

- Tying Root Cause methodology to PM or CBM inspection
- Developing contingency lists, Outage plans, and Capex needs
- Scenerio examples
- What to watch out for as the outage or capital project approaches

DURATION: 90 minutes

REGISTRATION FEE: \$100
